Property Address: \_\_\_\_\_ City, State, Zip: \_\_\_\_\_

Please describe below the exact location where you would like the fiber terminated on the outside of your building. If there is a particular room inside the house where you currently have or would like a wireless router, the exterior wall of that room would be the ideal location for us to run the fiber to. We will do our best to install the fiber to your desired location, however obstructions on the outside or underground may result in needing to find an alternative location. Please contact us for a site assessment if you need help determining the proper location.

By signing below, you warrant that you have the authority to grant permission to Starwire for performing the steps necessary for installation, including but not limited to: burying cables on the property, drilling holes in walls, and securing wire and enclosures to the building.
